

Nikunj Kumar Gupta

Senior Software Engineer | AI/MCP Orchestration | Full-Stack Development

Senior engineer with 7+ years at Informatica/Salesforce, focused on making enterprise integrations intelligent. Built MCP orchestration layers, AI-driven workflow engines, and zero-downtime infrastructure serving production customers at scale.

SKILLS

Languages & Frameworks: Java, JavaScript, TypeScript, React, React Native, Node.js, Apache Camel

AI & Integration: MCP Orchestration, AI Agents, RAG, LLM Integration, Enterprise Integration Patterns (EIP)

Cloud & Infrastructure: Docker, PostgreSQL, Kafka, Amazon S3, CI/CD

Security & Auth: OAuth 2.0, Mutual TLS (mTLS), IAM, SAML

APIs & Protocols: REST, SOAP, GraphQL, WSDL, OpenAPI/Swagger, XPath/XQuery

WORK EXPERIENCE

Informatica by Salesforce (5+ years)

Informatica acquired by Salesforce in 2026

Software Engineer MTS | Mar 2026 - Present | Bengaluru, India

- Architected an MCP orchestration layer enabling users to dynamically construct complex Informatica CAI workflows via LLMs. Engineered system prompts and schema validation to reliably generate executable CAI process XMLs leveraging existing Informatica connectors.
- Automated development environment configuration to meet strict Salesforce network and security compliance standards, enabling friction-free developer onboarding.

Lead Software Engineer | Apr 2025 - Feb 2026 | Bengaluru, India

- Led the design and implementation of MCP (Model Context Protocol) server interfaces, standardizing and exposing Informatica CAI application connections as tools for AI orchestration workflows.
- Designed and implemented auditing infrastructure in a Java-based orchestration engine, enabling customers to monitor, trace, and debug workflow executions in production—reducing support escalations and accelerating issue resolution.

Senior Software Engineer | Apr 2023 - Mar 2025 | Bengaluru, India

- Spearheaded AI Agent and RAG proof-of-concepts, evaluating architectures for process orchestration and intelligent automation.
- Designed and developed enterprise connector offerings (S3, Kafka, AMQP, Email) using Apache Camel and Enterprise Integration Patterns, adopted by multiple production customers.
- Engineered a zero-downtime PostgreSQL database upgrade feature using logical replication for Informatica Agent, eliminating data loss risk and reducing customer upgrade downtime to near-zero.
- Implemented Mutual TLS authentication, IAM integration, and OAuth 2.0 flows with full backward compatibility and feature-toggle support.
- Authored internal wikis and automation scripts that reduced dev onboarding time by 91% (2 hours to 10 minutes) across engineering teams.

Software Engineer | May 2021 - Apr 2023 | Bengaluru, India

- Contributed to a full UI modernization initiative, migrating legacy in-house JavaScript framework to React, improving maintainability and developer productivity.
- Resolved high-priority production incidents through log analysis, debugging, and root cause analysis (RCA), delivering timely patch fixes and ensuring customer SLA compliance.

Software Engineer II

HashedIn Technologies | Aug 2019 - May 2021 | Bengaluru, India

- Built cross-platform mobile application using React Native, delivering feature parity across iOS and Android.
- Developed Java backend services for Generali CSA-RSA (travel insurance platform), handling policy management and claims processing for 1,000+ active daily users.

EDUCATION

B. Tech. in Computer Science & Engineering

University of Petroleum and Energy Studies | Jul 2015 - May 2019 | Dehradun, India
